S.M. IFTIKHAR RASHA

Front End Web Developer

Address: Bashundhara R/A, Dhaka - 1229

E-mail: iftikharrasha@gmail.com

Phone: +8801980058647

Portfolio: iftikharrasha.netlify.app

Github: github.com/iftikharrasha

At this point in my career the main area of my expertise and personal preference is client side of the web even though I worked under some full stack web projects. I'm a fast learner who loves to push his own boundaries to solve complex problems logically. Currently I'm learning the MERN stack to upgrade the knowledge I have in this field.

Being a student of programing involves identifying a problem and execute practical solution. Since coming up with a solution is never a straightforward process, out-of-the-box thinking is often required and I love to do that often.

I know how to handle pressure, work efficient and match the deadlines. I always create projects under the idea of "less is more".

Recent Projects

Battle of Skills, NSUAC

🔗 **Live Link**

This is the latest project that I'm working on. Battle of Skills is the upcoming event of NSU Athletics club of North South University. The site is being made with React JS and React Bootstrap. Objective is to make a modern event manager page so they can reuse for their upcoming events in future.

NSU Haatbazar

🔗 **Live Link**

A Single page web application, working on this dream project under our faculty advisor. NSU Haatbazar was an entrepreneurship simulation that used to held back in 2010 – 2015. Our plan is to redeem the concept to bring out the hidden entrepreneurs of NSU in an online platform. Technologies used so far: React JS, React Bootstrap, Material UI, Mongo DB, Node - Express JS.

Nature & Care Agro Products Ltd.

🔗 **Live Link**

Nature & Care Agro Ltd. is a private company of BD, they provide solution for farmers to harvest healthy crops. Made their company website with Bootstrap4, JS, Jquery, PHP and MYSQL.

Ucademy – E Learning platform

🔗 **Live Link**

Ucademy is an E-learning platform from Switzerland, who're giving emergency aid courses to their students. They provided an Adobe XD file which I had to convert and execute properly to make their

whole site fully responsive and browser compatible. Used Bootstrap 4, JS and Jquery plugin, integrated php mailing system also for lead generation.

Dhikr Reminder App

🔗 **Live Link**

App landing page for a Muslim app of a company from Sri Lanka. To ensure their play store license I had to make their websites Home and privacy policy page with HTML5 CSS3 and Bootstrap4.
